WOOD LAMINATE

WHAT IS WOOD LAMINATE?

Wood Laminate combines the natural beauty of the world's finest timber veneers with the durability and performance of a high pressure laminate. The beauty of Wood Laminate comes from using only natural veneers which are chosen to display the characteristics figuration of each species. By careful selection Wood Laminates feature highly prized full figure sections of veneer rather than the less valued quartered areas. The clarity and warmth of the wood is then emphasised by textures which complement the natural grain.

ENVIRONMENTAL POLICY

All the veneers used in Wood Laminate products are obtained from sustainable sources where timber is farmed on managed land. Endangered timber species are not used.

PERFORMANCE

Wood Laminate (finished version) is manufactured in exactly the same manner as standard decorative laminate. The product is composed of resin impregnated backing sheets, quality wood veneers and finished with a transparent overlay to provide the durability and easy maintenance characteristics traditionally associated with decorative laminates. In addition, Wood Laminate meets the requirements of BS EN 438 regarding stain resistance covering products such as tea, coffee, etc.

COLOUR VARIATION

Wood Laminate is a natural product and therefore variations in colour and figure will occur. In addition the colour/shade of veneers can change through natural ageing.

N.B. Please state on your order if it is required to match existing Burgess tables.

CARE & MAINTENANCE

Light dirt or stains can be removed simply with warm soapy water or a mixture of warm water and detergent.
